GROWING STRAWBERRIES

STRAWBERRY PLANTS HAVE A THICK SECTION OF TISSUE CALLED THE "CROWN" BETWEEN THE STEMS AND ROOTS. YOUR PLANTS SHOULD BE PLANTED SO THAT THE CROWN IS EVEN WITH THE SOIL. BE SURE TO WATER THEM APPROPRIATELY, FERTILIZE WITH EITHER CONVENTIONAL OR ORGANIC FERTILIZERS, AND PROTECT YOUR PLANTS. HARVEST WILL LAST UP TO 3 WEEKS. YOU SHOULD HAVE AN ABUNDANCE OF BERRIES IN THE REFRIGERATOR FOR 3-5 DAYS.
